

Top 10 Reasons

to use TCS Managed Print Services

Total Corporate Solutions offers the easiest way to automatically monitor and manage copying and printing in your organization, giving you control over your costs and environmental impact. Our unique approach intercepts print jobs on the the print server and analyzes them, applying rules to enforce your print policies.

1 Cut Waste and Go Green

Encourage responsible printing with quotas and print policies, cutting paper and toner costs and power usage. At-a-glance reporting on CO2 and carbon emissions – by CO2 volume or by tree – shows the impact.

2 Apply Your Own Print Policies

With TCS, copying and printing is controlled according to policies that encourage or enforce appropriate access and use of your device fleet. Using software filtering or advanced scripting (JavaScript) you might route large jobs to dedicated high-speed printers, display popups to ask end users to confirm single sided output, automatically delete print jobs with incorrect paper sizes or suggest an alternative printer when a device is offline. Using forced attributes, you can convert color jobs to grey-scale and enforce to duplex where appropriate.

3 BYO Device Printing

Allow end users to print wirelessly from laptops, netbooks, iPads and iPhones with no driver installation or server authentication. Fully integrated into TCS standard print charging/accounting/quota process, jobs sent, are typically paused and then released by the user, directly from the most convenient MFP or printer.

4 Enable Find-Me / Secure Print Release

TCS protects confidential documents and slashes the volume of unclaimed printouts. With Find-Me printing, users queue print jobs to a virtual queue, and then release them for printing on any TCS-supported MFP or printer. Secure Print Release requires user authentication, by swiping a card or entering an account code to release and collect sensitive documents. Authorization of print jobs, prior to release, by managers, teachers or sys admins is supported.

More benefits of TCS Managed Print Services

Control costs
with simple account, bill or charge for every copy, print, scan and fax

Manage copiers
printers and users from a streamlined web interface

Report usage
and costs per page, by user, device and function

Access devices
via login, account code or ID/access card

Enforce
responsible use using rules, limits and auto-notifications

Secure
confidential documents and release anywhere with *Find-Me* print

5 Monitor and Report on Usage

TCS offers more than 80 user and shared account, copy, print, fax and scan reports, out of the box, in PDF, HTML or Microsoft Excel (.csv) format. Access reports from any web browser, or schedule them to be automatically generated and emailed. You can set up reports to use your own header, and create reports with custom data by specifying date ranges, filtering and sorting by the data available. The TCS Dashboard web interface enables real time visual monitoring of system, user and device status, including toner levels.

6 Deploy Simply

An installation wizard installs the server software and then proceeds to automatically detect printers and multi-function devices on your network. Create users and groups automatically from directory services including Active Directory, OpenDirectory, Novell eDirectory or LDAP. Install wizards help you define user types, access rights, page costs and quotas. Client software is optional and can be run directly off a server share avoiding the need to install/deploy locally. Device technicians can quickly install and configure MFPs with our embedded/onboard copy, scan and fax management software.

7 Administer Centrally, Manage Easily

Total Corporate Solutions provides browser-based administration access from any network location, providing advanced central management, control and configuration across all users and devices using an intuitive user interface. End users have access to a set of web tools to track their own activity in real-time, query their account balances, view transactions, add funds and view policies.

8 Fast Return on Investment

Return on Investment (ROI) is an important consideration in most network technology procurement procedures. Discover how reductions in printing and copy volumes and color toner usage will yield proven savings of 20% - 30%. These savings can result in the purchase being paid for in less than 6 months, if not sooner for many, ensuring faster access to actual reduced expenditure.

9 Scale Up Effortlessly

Modern software design and architecture provides scalability for networks of all sizes, from five to 500,000 users. Regardless of the number of servers and end users on your network, Total Corporate Solutions will scale to meet your needs.

10 Maximize Uptime and Availability

TCS delivers a robust approach to maintaining service by clustering at the print spooler, application server and database (for cluster-aware databases), as well as automatic fail-over protection against single points of failure.

TCS is California's number one and most respected consulting firm specializing in workflow optimization.

We are specifically positioned to help companies understand asset deployment, usage patterns and exact cost breakdown. Our revolutionary approach to business process evaluation and re-engineering can help you reduce costs, improve quality and increase efficiency. We design and review maps of how information flows within your organization, then we co-author a solution that improves the current infrastructure using a variety of tools:
